Your company was previously notified via a Notice of Detention and Hearing ("NOD"), dated September 9, 2020, that the above-referenced products appear to be out of compliance with the Act and therefore subject to refusal of admission. Specifically, your company was told that these products are unregistered pesticides because the label makes pesticidal claims and the products are not registered with EPA in accordance with FIFRA § 3(a), 7 U.S.C. § 136a(a). Unregistered pesticides are prohibited from sale and distribution in the U.S.; therefore, any sale or distribution of these wipes is a violation of FIFRA § 12(a)(1)(A), 7 U.S.C. § 136j(a)(1)(A).

The NOD further afforded you an opportunity to explain why the shipment should not be destroyed or refused entry. No material demonstrating that the product is in compliance with the Act and eligible for entry has been submitted to EPA. Instead, on September 29, 2020, your customs broker sent EPA links to the National Library of Medicine listings for this product and noted that the FDA-accepted label for this product describes it as hand sanitizers. However, the shipper's website displays photos of this product in which the label has claims the product can be used on surfaces and objects.

EPA therefore hereby notifies you that your merchandise has been refused admission. You must export this merchandise, under supervision of the U.S. Customs and Border Protection (CBP) and within ninety (90) calendar days from the date of this Notice or within such additional time as EPA or the District Director of CBP specifies or dispose of the products. Failure to do so may result in either the destruction of the merchandise as authorized by the Act, or, if the shipment has been released to you under bond, in any action necessary to enforce the terms of said bond.

EPA acknowledges that the COVID-19 pandemic may be impacting your business. If that is the case, we will consider your specific circumstances in determining an appropriate timeline for complying with this notice, while still ensuring that the Agency receives the information it needs to timely confirm your company's compliance with FIFRA; such consideration does not extend to allowing the shipment and distribution of misbranded products into the United States.
